

Piyush Soni

Full-stack engineer with a focus on backend architecture, AWS infrastructure, and shipping systems that scale

piyushsoni98@gmail.com · +91 74339 21789 · Surat, India · AWS Certified Developer – Associate

RELEVANT EXPERIENCE

Full-Stack Engineer · devx ai labs (client: The Sleep Company)

Sep 2025 – Present

- Own the full pre-order journey of a custom POS + e-commerce platform for a 251-store retail chain — Shopify sync, cart, coupon engine, and a multi-provider payments layer (Razorpay, PineLabs, Snapmint, Gyftr).
- Act as technical lead: scope tickets with EM/PM, choose AWS services for new features, and support two other engineers.
- Traced and fixed a production race condition duplicating paid orders under load, and scaled Elasticsearch after a Unicommerce integration.

Stack: Node.js, NestJS, React.js, GraphQL, AWS (Fargate, DynamoDB, SQS, Elasticsearch), Unicommerce

Software Engineer · EquityPandit

Aug 2023 – Feb 2025

- Rebuilt a legacy Laravel financial-advisor portal from scratch on Node.js (MVC) and Next.js, mentoring 2 junior developers under a 3-month deadline.
- Designed RFP-driven advisor onboarding and admin/advisor/user dashboards; scaled to 150,000+ registered advisors.
- Owned the Unicorn wallet module end-to-end and led a 2-person team rebuilding the React landing page off core PHP.

Stack: Node.js, Next.js, MySQL, JWT, React.js, PHP, Laravel, Firebase

Full-Stack & Founding Engineer · StepsStamp

Feb 2025 – Sep 2025

- Co-created a blockchain fitness-rewards app from MVP; after seed funding, hired and led 3 senior developers.
- Architected NFT purchase, token-mining, and vesting smart contracts on BNB Smart Chain with fully on-chain anti-cheat logic.
- Took sole ownership of the React Native/Expo app and 4 production smart contracts after the team scaled back down.

Stack: Solidity (BNB Smart Chain), React Native, Expo, Kotlin, Node.js, MongoDB

Web Developer · Codesdot Solutions

Mar 2022 – Jul 2023

- Single handedly ran 2 client accounts across back-to-back shifts, leading 2 juniors and 3 interns; awarded a best-employee bonus.
- Built Laravel APIs and a custom WordPress plugin; optimized MySQL queries and managed Docker/CI-CD pipelines.

Stack: PHP, Laravel, WordPress, MySQL, Docker

IT Support (Web) · Elpro GmbH, Berlin

Dec 2019 – Mar 2021

- Maintained internal WordPress portals and supported marketing/product teams with technical tasks.

SKILLS

Languages & Frameworks JavaScript (ES6+), TypeScript, Node.js, NestJS, React.js, Next.js, React Native, PHP, Laravel, Solidity, Kotlin

Data MySQL, MongoDB, DynamoDB, Elasticsearch, Redis

Cloud & DevOps AWS (Fargate, Lambda, DynamoDB, SQS, Elasticsearch, CloudWatch, CloudFront, Cognito, S3, ECR/ECS), Docker, Git, CI/CD

APIs & Auth REST, GraphQL, JWT, Websockets, Bearer-token auth

Web3 BNB Smart Chain, Solidity smart contracts, MetaMask/Reown

SELECTED PROJECTS

Unicorn Signals Financial-advisor platform on the Play Store — backend & admin panel serving 150,000+ registered advisors. equitypandit.com/unicorn

StepsStamp Blockchain-based fitness-rewards app on the Play Store — architected NFT/token-mining smart contracts. stepsstamp.com

Tiffin10 Personal project — Razorpay-based meal-slot booking app with automatic payment reconciliation.

EDUCATION

B.Sc. Information Technology (incomplete) Free University of Berlin

B.Tech, Mechatronics (1 year) Ganpat University

HSC, Science Stream Gujarat Board

CERTIFICATIONS

AWS Certified Developer – Associate

Claude Certified Architect – Foundations

Gemini Enterprise Agent Dev & Deployment

freeCodeCamp – Back End Dev & APIs

TestDome – WordPress & PHP

LANGUAGES

English (Intermediate), German (Conversational), Hindi & Gujarati (Native)

INTERESTS

Yoga, exploring new places, cooking, table tennis
